OUTRAGE NEAR FUCHAU. The Chinese Attack a Mission Hot

Near That Place. Hong Koog, Aug. 22.-Information has foriated natives, armed with weapons of every conceivable kind, naide an attack a few days ago upon the American mis-sion near Fuchau and wrecked the chapel and school attached to the mission. Four native scholars attending the school were wounded, but the teacher, an American,

acceeded in making his escape. The strong anti-foreign feeling which exists in Fuchau is spreading rapidly. The populace parade the streets shouting "Drive out the fereign devils," and it is

not safe for a foreigner to show himself. A London cable dispatch says A dis-patch to the Times from Hong Kong confirms the report of the attack upon the American mission chapel and school near Fuchau, and adds that Capt. Newell, of the United States croiser Detroit, has gone from Fuchau to Kucheng. The dispatch also says that thousands of additional anti-foreign pamphlets and placards have been distributed throughout Canton.

CITY UNDER GROUND.

Interesting Discovery Made by Russtan Explorers in Asia.

The Russians have made a singular discovery in Central Asia. In Turkestan, on the right bank of the Amou Daria is a chain of rocky hills near the Bokharan town of Karki, and a number of large caves, which, upon examination, were found to lend to an undergorund city, built apparently long before the Christian era.

According to effigies, inscriptions and desiens upon the gold and silver money unearthed from among the ruins, the existence of the town dates back to some two cen-

turies before the birth of Christ.

The underground Bokharan city is about two versts long, and is composed of an enormous labyrinth of corridors, streets and squares, surrounded by houses and othen

mildings two or three stories high. The edifices contain all kinds of domestic

itensils, potr, urns, vases, etc. The high degree of civilization attained by the inhabitants of the city is shown by the fact that they built in several stories, by the symmetry of the streets and squares and by the beauty of the baked clay and metal utensils, and of the ornaments and coins which have been found.

It is suppored that long centuries ago this city, so carefully concealed in the bowels of the earth, provided an entire population with a refuse from the incursions of nomadio savages and robbers.-London Pub-

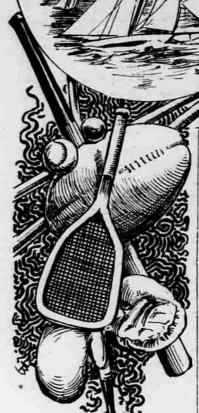

Bridge Forty-one Miles in Length. A gigaptic undertaking, the bridging over of Polk's Strait, separating the Isl Ceylon from the mainland of India, is seriously proposed by the Ceyion government, says the Philadelphia Telegraph. The strait is forty-one miles broad at its narrowest point, double the width of the English Chanpel, but is very shallow, in many places only six feet deep. The islands, reefs and chan nels in it have been recently surveyed, and the cost of works, extending over sixty-one miles, including the Pambam Channel, and the Adam's Bridge reef, is estimated at 28,000 000 rupees. The ends will be connected by 145 miles of railroad with Colombo, the great harbor of Ceylon, on on the one side, and by ninety miles of road, with Madina, the nearest point on the Indian railroad system, on the other. If narrow gauge is used this can be done for 11,6000 .-

Norsemen Crowding Cape Cod Folks. Most of the men employed in the granite quarries of Cape Ann are Swedes, Norwe-gians or Danes, and that region is said to be fast becoming a new Scandivania. Even the dialect, the picturesque "down-east" lingo of Hosea Bigelow, is feeling the effect of the Norse influence. Travellers further down the coast on Cape Cod, and particularly at Provincetown, marvel at the extent to which Portuguese immigrats have altered the face of things. These dark-skinned settlers have revolutionized the local fishing in dustry and in many cases driven the Yankee sallorinan into new fields. A New York visitor to Provincetown a few days ago was amazed to find on boarding the largest whaling vessel in port that it was manned and captained by Cuban negroes.
